## **WHAT WE DO**

Concrete Logistics Limited provides a comprehensive range of durable waterproofing solutions, admixtures and surface applications for concrete structures.

The products we sell and apply are manufactured by leading global manufacturers such as Kryton, Bauer and Laticrete.

Our concrete waterproofing solutions include the ground-breaking KIM, a permanent and reliable crystalline hydrostatic waterproofing concrete admixture suitable for applications such as:

- Below grade structures such as basements, underground parking, foundations and elevator pits.
- Concrete roof slabs and bridge decks.
- Liquid containment structures such as dams, reservoirs, water tanks, sewage plants and swimming pools.
- Water conduit structures such as canals, sluiceways and storm drainage.
- Marine structures such as sea walls, dry docks and jetties.

Our range of concrete waterproofing products provide built-in permanent solutions for new structures as well as durable remedial waterproofing of existing concrete structures.

In addition, we provide a wide range of construction chemicals, floor coatings, tile adhesives and decorative coatings. We also provide a construction de-watering service, as well as rentals of certain construction equipment.

We have been present in the Nigerian market for more than 10 years and have built a strong reputation working with many of the leading construction firms and consultants in the industry.

Our mission is to protect and enhance your investment in concrete.

# Products & Services Offering

We currently offer the following products & services:

Kryton concrete waterproofing and durability solutions  
[www.kryton.com](http://www.kryton.com)

Laticrete construction chemicals
